FINAL REJECTION

The Terminal Disclaimer filed 8/14/07 was approved. The rejection on the ground of nonstatutory obviousness-double patenting was withdrawn.

Claim Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 4-7 are rejected under 35 USC 102 (b) as being anticipated by Hughes (US 4,785,253).

Regarding claim 1, Hughes discloses in Figures 2-5 a filter circuit comprising:

- a main filter (A10, R10-R12, C10-C12) that performs filtering processing with a cut-off frequency that can be controlled by adjusting a constant or a coefficient related to a constituent element using a control signal;
- a reference filter (113) that passes a signal, provided from an exterior (100) and having a constant period;
- a phase difference detecting circuit (101) that detects a phase difference between an output signal of the reference filter and the signal having the constant period provided from the exterior, thereby outputting the phase difference; and
- a register (109) that holds an output signal of the phase difference detecting circuit,

Art Unit: 2816

wherein the cut-off frequency of the main filter is controlled using an output signal of the register as the control signal

- Regarding claim 4, wherein the phase difference detecting circuit (101) outputs a signal having a duty ratio corresponding to the phase difference.
- Regarding claim 5, wherein the main filter and the reference filter are formed of an analog filter.
- Regarding claim 6, wherein a cut-off frequency of the main filter is allowed to vary using the output signal of the register (109).
- Regarding claim 7, wherein the filter circuit is installed in a semiconductor integrated circuit for reducing size, see lines 5-10 of column 1.

Allowable Subject Matter

Claims 1 and 8-9 are allowed because the prior art of record fails to suggest "a decoder" as combined in claim 1.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2816

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
